Hi Ravi,

I recently contacted Boeing's usual point of contact with the City of Tukwila, Carol Lumb, to provide a courtesy update on our upcoming sheetpile work. Miles and I didn't want it to be a surprise once we mobilize. Boeing does a lot of work with Tukwila, and so this was a typical communication for us. At Carol's request, I forwarded to her your approval letter.

She understands the "exemption" from local regs and requirements provided through the CERCLA process, but more for her files she asked for the citation from the statute or rules that provides for that exemption. Is providing the best CERCLA citation something you can help me with? There may also be a policy guidance doc on this as well. It's always been a given for me, and I would appreciate your help on this question. Please let me know if you can assist in this question, thanks.
